# SUBJECT INDEX
# VOLUME 164

Acetate
  *A. vinelandii* diauxic growth
    effects on glucose uptake system, 866
Acetate assimilation
  *M. barkeri*, 618
Acinetobacter sp.
  hexadecane and hexadecanol metabolism
    alcohol dehydrogenases, 1017
    fatty aldehyde dehydrogenases, 1011
Aconitase regulation
  *B. subtilis citB*, 155
  carbon source, 155
Adenine methylation
  *E. coli*, 490
Adenylate cyclase
  *E. coli cya*
    cyclic AMP-cyclic AMP receptor protein, 872
    negative regulation, 872
*Aeromonas hydrophila*
  Lipopolysaccharides, 263
  O-polysaccharide antigens, 263
*Aeromonas salmonicida*
  A-layer cell surface protein array
    Congo red agar detection, 1233
    effects of salt concentrations, 1233
    virulence determination, 1233
  surface array virulence protein
    Congo red binding, 1332
    porphyrin binding, 1332
*Agrobacterium rhizogenes*
  root-inducing plasmid
    transferred DNA, 33
*Agrobacterium* spp.
  unique insertion sequence, 918
*Agrobacterium tumefaciens*
  attachment to plant cells, 102
  crown gall disease, 723
  Ti plasmid virulence genes
    regulation, 774
    *ros* negative regulator, 774
  tumor-inducing plasmids, host range, 723
    agrocin 84 sensitivity, 723
  virulence
    2-linked-β-D-glucan, 102
Alanine-valine transaminase
  *E. coli*
    inhibition by β-chloro-L-alanine, 1350
A-Layer cell surface protein array
  *A. salmonicida*
    Congo red agar detection, 1233
    effects of salt concentration, 1233
